

HOT GROUND IN KANO
Surface temperature, March to May

Surface heat, °C

≤ 44
44–45
45–46
46–47
47–48
> 48

This map shows how hot the ground gets in the hot season, not the air. Each cell is a 200-metre neighbourhood, over twelve years of Landsat. Blue is cooler ground, red is hotter.
